TOM OS

Keyboard shortcuts — Hyprland edition

SUPER is the Windows / Cmd key. Everything here works out of the box on the live USB and the installed system.

Applications	
SUPER + Enter	kitty — terminal
SUPER + W	WordCraft — text editor / word processor
SUPER + Z	Zoiper 5 — SIP softphone
SUPER + E	Nautilus — file manager
SUPER + B	GNOME Web — browser
SUPER + D	wofi — application launcher

Window management	
SUPER + Q	Close the focused window
SUPER + F	Toggle floating / tiled
SUPER + P	Toggle pseudo-tiling
SUPER + F11	Fullscreen
SUPER + Arrows	Move focus between windows

Workspaces	
SUPER + 1 … 5	Switch to workspace 1–5
SUPER + Shift + 1 … 5	Move the focused window to workspace 1–5

Screenshots	
Print	Full-screen screenshot (saved to ~/Pictures)
SUPER + Print	Region screenshot (select with mouse)

Media and hardware	
Volume keys	Raise / lower / mute audio
Play / Next / Prev	Media playback control
Brightness keys	Backlight brightness up / down

Session

SUPER + L	Lock the screen (hyprlock)
SUPER + Shift + L	Lock and suspend
SUPER + Shift + E	Log out of Hyprland
SUPER + Shift + B	Switch bar: Quickshell neon bar (default) ↔ Waybar — remembered after reboot

Quickshell bar — mouse controls

Click TOM OS chip	Open the app launcher
Click workspace number	Jump to that workspace (the pink pill is the one you are on)
Click volume	Open the pavucontrol mixer
Right-click / scroll volume	Mute / unmute — scroll to change volume in 5% steps
Click network badge	Open network settings (Wi-Fi bars, “wired” or “offline”)
Tray icon (L / R click)	Activate the app / open its menu
Click power button	Power menu: Lock · Suspend · Restart · Shut down · Log out

TDM — login screen

Enter (user field)	Jump to the password field
Enter (password field)	Sign in to the selected session
Esc	Cancel a sign-in that is in progress
Eye icon	Show / hide the password (Caps Lock warning appears automatically)

kitty — terminal

Ctrl + Shift + Enter	New window (same directory)
Ctrl + Shift + T	New tab (same directory)
Ctrl + Shift + K	Close tab
Ctrl + Shift + Left / Right	Previous / next tab
Ctrl + Shift + F2	Edit the kitty config file
Ctrl + Shift + C / V	Copy / paste (kitty defaults)
Auto-start	fastfetch runs each time kitty opens — skip it with TOMOS_NO_FASTFETCH=1

Live USB login: user **tom**, password **live** — the TDM login screen greets you with “Welcome to Tom OS”.
Full keybind reference: ~/.config/hypr/hyprland.conf and ~/.config/kitty/kitty.conf inside Tom OS.
